YASIR ARAFAT NOMAN

Cybersecurity Undergraduate Student

+8801322149502 | yasirnoman009@gmail.com | https://github.com/yasir-noman

EDUCATION:

AMERICAN INTERNATIONAL UNIVERSITY-BANGLADESH (AIUB)

BSc in Computer Science & Cyber Security
Expected Graduation: 2028 | CGPA: 3.51 / 4.00

HSC (2023)
Dhaka Commerce College, Dhaka
Passed with GPA 5.00 in Science

SKILLS:

- **Core Security:** Vulnerability Assessment, Web & Network Security, Phishing Analysis
- **Penetration Testing & Web Tools:** Wireshark, Metasploit, Burp Suite, Katana, Nmap, Gobuster
- **IDS / IPS & Network Monitoring:** Suricata, Snort, Wireshark, Nessus
- **Programming & Databases:** Python, C++, Java, MATLAB, SQL, Git
- **OS & Environment:** Kali Linux, Windows

CYBERSECURITY PLATFORMS:

- **Google Cloud Cybersecurity Labs:** Completed practical labs focusing on Cloud Security and IAM (Identity & Access Management) policies.
- **Hack The Box (HTB):** Actively solving machines and CTF challenges focused on Linux Privilege Escalation and Web Pentesting.
- **PicoCTF:** Participated in global Capture The Flag competitions, solving challenges in Cryptography, Forensics, and Reverse Engineering.

SUMMARY:

Cybersecurity undergraduate with a strong foundation in computer networking, information security, and programming. Hands-on experience with security tools, web vulnerability assessment, network scanning, and cybersecurity projects. Passionate about ethical hacking, threat analysis, and continuously developing practical security skills.

CERTIFICATIONS & TRAINING:

- **Introduction to Critical Infrastructure Protection (ICIP)**
  Issuer: OPSWAT Academy (June 2026 – June 2027)
  Key Topics: Critical Infrastructure Protection, Industrial Cybersecurity Standards & Compliance.
- **Google Cloud Cybersecurity Certificate (Beginner)**
  Provider: Google Skills / Google Cloud
  Courses Included: Cloud Security Principles, Risk Management Strategies, Threat Identification & Protection.
- **Cryptology Today — An Introduction to Modern Cryptography**
  Issuer: Tohoku University (via JV-Campus)
  Key Topics: Public-Key Cryptography, Symmetric Ciphers, Digital Signatures, Hash Functions, Security Protocols.

Cisco Networking Academy Certifications:

- **Cybersecurity Essentials & Administration:** Threat Intelligence, Network Defense Strategies, Security Management.
- **IT Essentials:** Computer Hardware, Software Maintenance, Networking Fundamentals, Troubleshooting.

PROJECTS:

LINKWIZ (PHISHING DETECTOR) | PYTHON, FLASK, JS
- Multi-vector phishing scanner for URLs, QR codes, and SMS using heuristic analysis.

PORT SCANNER | PYTHON, FLASK, SOCKETS
- Web-based network reconnaissance tool to scan the top 1000 TCP ports using multithreading.

FILE INTEGRITY MONITOR | PYTHON, WATCHDOG, WINOTIFY
- Real-time file monitoring system with instant Windows desktop notifications for unauthorized changes.

HASHCRACKER | PYTHON, MULTIPROCESSING
- Multi-core brute-force tool to crack 8-digit numeric hashes efficiently using all CPU cores.
